

IsatPhone 2 Firmware 01.12.00

Briefing note
29.9.2016

IsatPhone 2 firmware version 01.12.00 is released and available for download now. Follow the link below:

<http://www.inmarsat.com/support/isatphone-2-support/>

Firmware version 01.12.00 supersedes the firmware version 01.08.01 that was released in October 2015.

Recommendations for installation

This is a **recommended** firmware upgrade, meaning that the features introduced by the firmware are important but not critical for the GSPS service including the network and the IsatPhone 2 handset.

Pre-requisites for installation and advice after installation

In order to upgrade the handset's firmware you must have a PC running Windows 8, Windows 7, Windows Vista or XP. The latest version of USB drivers and IsatPhone 2's firmware upgrade tool must be installed. These can be found in the Inmarsat Support website by visiting <http://www.inmarsat.com/support/isatphone-2-support/>

Please read the installation guides for the firmware upgrade tool and USB drivers which are also downloadable from the website.

Installing IsatPhone 2 firmware 01.12.00

To install IsatPhone 2 firmware 01.12.00:

- a. Ensure that USB drivers and the firmware upgrade tool are installed on your PC
- b. Double click on Inmarsat's firmware upgrade tool and follow on screen instructions.

The firmware upgrade will take approximately between 7 and 12 minutes. After installation, you can check the firmware version by switching on the phone and selecting **Menu > Settings > About > Firmware version**
